

Year 8 Practice Paper 1

Solve problems of duration involving 12- and 24-hour cycles across multiple time zones

Question 1 (Simple familiar)

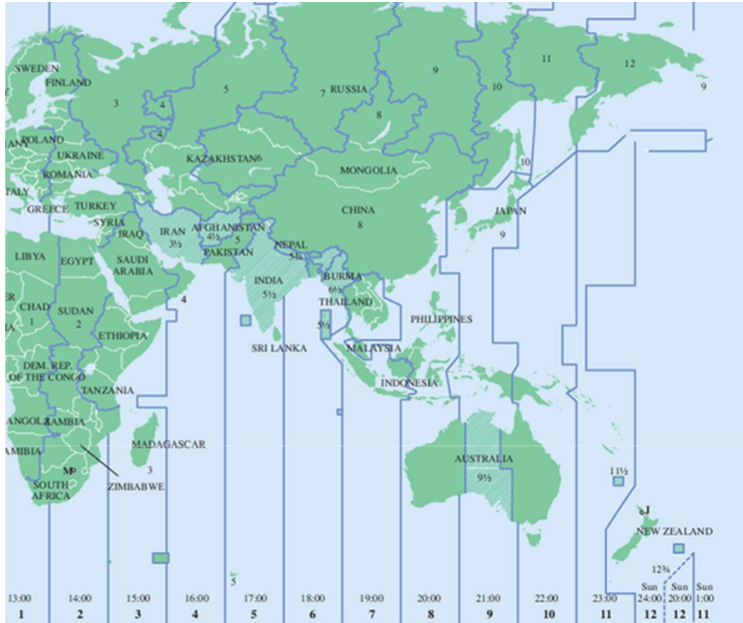

- a) Calculate the time:
- 2 ½ hours after 13:00 3 hours before 15:30 70 mins after 04:55
- b) Ariana flight departs at 5:15am and lands at 10:45am in the same time zone. How long is her flight?
- c) Marcos starts work at 9:18 am and will work until 3:20pm. How long will he be at work?
- d) Assuming he has a half hour lunch break, how much time will his pay sheet show?

Question 2 (Complex familiar)

Sophie is organising an international E-sports tournament. She lives in Adelaide and will begin the tournament at 3:11pm (Australian Central Standard Time). Use the time zone diagram to complete the table. *HINT: Adelaide is located at the 9 ½ time zone on the map.*

Players Location	Player's Local Start Time
------------------	---------------------------

	Start Time
New Zealand Player	
Western Australian Player	
Russian Player	
South African Player	

Apply algebraic properties to rearrange, expand and factorise linear expressions

Question 3 (Simple familiar)

a) Simplify:

$$12a + 5a$$

$$10a + 8b - 4a - 7b - 5$$

b) Simplify:

$$10a \times 4bc$$

$$\frac{20rs}{4r}$$

$$5(3 + a)$$

$$-3q(1 + q)$$

c) Factorise:

$$3x + 18$$

$$12t - 18$$
